PILOT PA200E 2 Place MiniCom and Expansion Module

The Pilot PA200 MiniCom breaks new ground in size, ease of operation and price in 2/4 place voice activated portable intercoms.

All you have to do to use your Pilot PA 200 MiniCom is place a 9 volt battery in the battery compartment, plug in your headsets and turn the volume control to on. The squelch knob is used to compensate for background noise levels and should be set so that the intercom's voice activation turns on the intercom audio when you speak at a normal voice level.

The microphone jack on the intercom lead incorporates a Y-block with provision for two press-to-talk switches, one for the pilot and one for the co-pilot. Bear in mind that most press-to-talk switch leads have a male microphone jack as well as a female microphone socket. When using a press-to-talk switch with the PA 200 MiniCom, the male microphone jack is plugged into the back of the Y-block. The female microphone socket is not used (the microphone jack from your headsets being plugged directly into the intercom). Please note, that both pilot and co-pilot mics are "live" at all times meaning that when either press-to-talk switch is pressed voice from both pilot and co-pilot will be transmitted. This is usually only a concern if the expansion module is used when the co-pilot could be talking to the other passengers as the pilot transmits.

The PA 200 Expansion Module is connected to the MiniCom using the lead supplied. The Expansion Module allows four headsets to be connected to the intercom system. The expansion Module does not require a separate battery.

Please note, that as an added battery saving feature, the PA200 is automatically switched off when the pilot side phone plug is removed.

Your PA200E should have come with the following components:

PA200 MiniCom
PA200 Expansion Module
Connection Lead

Specifications and Features

On/Off volume control
Adjustable squelch circuitry
Fail safe capability
Y-adapter for two press-to-talk switches
Powered by 9v battery
Up to 24 hours use on one battery
Measures 5.7cm x 3.5cm x 7cm
Weighs only 8oz (227gms)
3 year warranty
