PILOT PA200IK

2 Place MiniCom

The Pilot PA200 MiniCom breaks new ground in size, ease of operation and price in 2 place voice activated portable intercoms.

All you have to do to use your Pilot PA 200 MiniCom is place a 9 volt battery in the battery compartment, plug in your headsets and turn the volume control to on. The squelch knob is used to compensate for background noise levels and should be set so that the intercom's voice activation turns on the intercom audio when you speak at a normal voice level.

To use with a hand held radio, the plug on the PA200 MiniCom should be plugged into a compatible radio. The slide switch on the end of the PA200 MiniCom should be set to the type of radio being used. The press-to-talk switch supplied should be plugged into the PTT socket on the front of the PA200 MiniCom.

Please note, that as an added battery saving feature, the PA200 is automatically switched off when the pilot side phone plug is removed.

Your PA200IK should have come with the following components:

PA200 MiniCom with plug suitable for Icom A22 or Bendix-King KX99
Press-to-talk switch and cable

Specifications and Features

On/Off volume control
Adjustable squelch circuitry
