## *PILOT PA200T 2 Place MiniCom*

The Pilot PA200 MiniCom breaks new ground in size, ease of operation and price in 2 place voice activated portable intercoms.

All you have to do to use your Pilot PA 200 MiniCom is place a 9 volt battery in the battery compartment, plug in your headsets and turn the volume control to on. The squelch knob is used to compensate for background noise levels and should be set so that the intercom's voice activation turns on the intercom audio when you speak at a normal voice level.

To use with a hand held radio, the plug on the PA200 MiniCom should be plugged into a compatible radio. The slide switch on the end of the PA200 MiniCom should be set to the type of radio being used. The press-to-talk switch supplied should be plugged into the PTT socket on the front of the PA200 MiniCom.

Please note, that as an added battery saving feature, the PA200 is automatically switched off when the pilot side phone plug is removed.

The PA200T MiniCom may also be connected to your cell phone or a music source such as an MP3 player, walkman or similar.

To use your cell phone, plug the 3.5mm jack on the cable provided into the socket on the front face of the PA200T MiniCom and plug the 2.5mm jack into the "hands free" socket on your cell phone. If your cell phone does not use the industry standard 2.5mm plug you will have to obtain an adapter.

To use a music device with your PA200T, plug the 3.5mm jack on the cable provided into the socket on the front face of the PA200T MiniCom, insert the 2.5mm jack into the 2.5/3.5 adapter and plug the adapter into your music device.

### **Your PA200T should have come with the following components:**

PA200 MiniCom  
Cell phone adapter cable  
2.5mm to 3.5mm adapter

### **Specifications and Features**

On/Off volume control
